

Johnson & Johnson Issues Statement Regarding Existing DOJ Inquiry

July 12, 2019

New Brunswick, NJ – As we previously disclosed in our [February 2019 SEC filing](#), we have received a subpoena from the U.S. Department of Justice. We are fully cooperating with the DOJ investigation. The key documents on this issue have been publicly available for months on our website: <https://www.factsabouttalc.com/>. These documents establish that Johnson’s Baby Powder does not contain asbestos or cause cancer, as supported by decades of independent clinical evidence. The implication that there has been a new development in this matter is flatly wrong.
